WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/KR2005/000045

Box No. V	Reasoned statement under Rule 43bis.1(a)(i) with regard citations and explanations supporting such statement	to novelty, inventive step or industrial applicability;
		_

Statement			
Novelty (N)	Claims		YES
	Claims	1-9	NO
Inventive step (IS)	Claims		YES
	Claims	1-9	NO
Industrial applicability (IA)	Claims	1-3, 7-9	YES
	Claims		NO

2. Citations and explanations:

The following documents are referred to in this report:

DI: WO 88/3806 A1

D2: EP 297733 A2

The present invention relates to an antibiotic composition against Propionibacterium acnes, Staphylococcus epidermis and Staphylococcus aureus which induce acne, comprising lignan compounds represented by formula (I) and their use as antibacterial and treatment of acne.

D1 discloses a composition of catecholic butanes and the use thereof in treatment of disorders of the skin including acne.

D2 relates to compositions useful in treatment of solid tumors of the skin, and in treatment of other disorders of the skin e.g. acne comprising catecholic butane.

1. Novelty

The general formula of catecholic butane described in D1 and D2 include the definition of lignan compounds in the present invention. D1 and D2 specifically disclose 1,4-bis(3,4-dihydroxyphenyl)-2,3-dimethylbutane which is the same compound as the compound of the present invention wherein R1 and R2 = hydroxy group, R3 = 3,4-dihydroxyphenyl group in formula (I). Moreover, D1 and D2 disclose the antibacterial property against Propionibacterium acnes and Staphylococcus aureus of catecholic butane compounds and teach their use as an anti-acne composition.

Therefore, the present invention is considered to lack novelty over D1 and D2.

2. Inventive Step

Since the novelty of the present invention is negated by D1 and D2, the inventive step of the present invention cannot be acknowledged, either. (Continued on Supplemental Sheet.)

Supplemental Box

In case the space in any of the preceding boxes is not sufficient. Continuation of:

3. Industrial Applicability

For the assessment of the presently worded claims 4-6 on the question whether those subject-matter is industrially applicable, no unified criteria exist in the PCT. The patentability under national patent law can also be dependent on the formulation of the claims. The KIPO, for example, dose not recognize the subject-matter of claims to the use of a compound in medical treatment as being industrially applicable.
